

# Chuck Cappers

**LIQUID  
PACKAGING  
SOLUTIONS, Inc.**

## CAPPING PRINCIPLE

Chuck cappers use a chuck head that is sized to a specific cap and a rubber chuck insert to tighten caps onto containers. The cap is placed on the container and the chuck head is placed over the cap. Torque is then applied to the cap to create a consistent and reliable seal on each container.

## Other Capping and Sealing Principles

- Spindle Capping
- Snap Capping
- Spindle/Snap Capping
- ROPP Capping
- Induction Sealing
- Neck Banding

# Chuck Cappers

## OPTIONS:

- Adjustable cap chute on automatic capping machines
- Various automatic cap sorting devices for different caps run on automatic cappers (sorting elevator, vibratory bowl, centrifugal feeder)
- Power conveyor
- Multiple chucks to run a wide variety of cap sizes
- Nitrogen purge systems
- Heated cap options
- Cap sterilization options
- Hazardous environment construction
- Special electrical requirements
- Spare parts kits
- Handheld, Semi-automatic and Automatic capping machines

## Standard Features:

- Handheld, semi-automatic and automatic chuck capper models
- Simple adjustments for container changeover
- Simple capper operation
- Various chuck and chuck insert sizes for different cap types and sizes
- Pneumatic and electric capping equipment available
- Automatic cap delivery systems for automatic capping machines
- Easy height adjustments for small to large containers

## Benefits:

- Chuck capper models available for any production requirement
- Quick and simple container changeover for increased productivity
- Simple operation increases efficiency and productivity
- Automated cap delivery systems on automatic cappers reduce operator interaction
- Chuck and chuck inserts allow for consistent and reliable seals
- Made in the USA
- Different chuck and chuck insert sizes allow cappers to work with a variety of cap types and sizes.

## Additional Products and Services:

- Container cleaning
- Sealers
- End of the Line Equipment
- Liquid Fillers
- Coders
- Full line Integration
- Conveyors
- Labelers
- Turntables
- Container separation
