

# Piston Filler

**LIQUID  
PACKAGING  
SOLUTIONS, Inc.**

## FILLING PRINCIPLE

A piston filler utilizes a volumetric fill principle by using a "piston" and cylinder. Product is pulled into a cylinder from the bulk supply by the inward stroke of the piston, then with the outward stroke of the piston, product is pushed out through the fill heads into the container

## Typical Products

- Viscous Products
- Personal Care Products
- Creams/Lotions
- Gels
- Heavy Sauces
- Salsas
- Salad Dressings
- Paste
- Heavy Oils
- Lubricants
- Flammable Products

## Other Filling Principles

Gravity - Overflow - Pump

Volumetric - Net Weight

Fill To Level with Vision System

## Standard Features:

- One or multiple cylinders
- PLC with user friendly touchscreen interface
- Easy height adjustment
- Tool-free adjustments
- Robust construction— built to run 24/7
- Simple and quick changeover
- Designed to integrate with existing equipment
- Detailed set-up documentation and manual

## Benefits:

- Built to your size, specifications, and production requirements
- Accurate
- Made in the USA
- Customize your machine to fit your specific needs without purchasing unnecessary components
- Upgradeable
- Portable—designed to roll up to your existing line
- Easy changeover for greater efficiency

## Additional Products and Services:

- Container cleaning
- Cappers
- Conveyors
- Turntables
- Sealers
- Coders
- Labelers
- Container separation
- End of the Line Equipment
- Full line Integration
